

## Axesstel's MV440 CDMA 1xEV-DO Rev. A Gateway Solves Residential Broadband Internet Access for Rural Carrier Association Operator

### **Challenge:**

Cellcom, a cellular/PCS service provider in rural Wisconsin and upper Michigan, wanted a reliable fixed wireless solution to provide easy to use, plug-and-play residential broadband Internet access for its residential, small office/home office, enterprise and commercial customers.

### **Solution:**

Initially Cellcom trialed the Kyocera KR2 router but after experiencing technical issues that caused the router to disconnect daily, it looked for another solution. It chose Axesstel's MV440 CDMA 1xEV-DO Rev. A Gateway for its user friendly, integrated modem that virtually eliminates user error when operating the product. An integrated Wi-Fi router allows access to broadband data from any room in a home or office and trouble-free set up of a local hotspot. In addition the Gateway features receive diversity for optimized device performance and user experience, with battery back-up to provide wire-free access from virtually any environment.

### **Benefits:**

MV440 enables this rural cellular/PCS service provider's customers to experience broadband data at speeds up to 3.1Mbps for high-speed access to email, the Internet, data intensive files and multi-media streaming. The four port Ethernet switch provides capacity to network multiple desktop PCs, laptop and WI-Fi enabled devices, while offering the convenience and networking necessary to enable a variety of applications. A USB port provides an additional connection.

### **About Cellcom**

Cellcom's renowned network provides nationwide long distance cellular service, including wireless voice and data services, and is customized to rural markets and customers. Cellcom's goal is to consistently provide extraordinary customer care.

### **About Axesstel, Inc.**

Axesstel (AMEX:AFT) is a recognized industry leader in the design and development of fixed wireless voice and broadband data products. Axesstel's best in class product portfolio includes broadband modems, 3G gateways, voice/data terminals, fixed wireless desktop phones and public call office phones for high-speed data and voice calling services.
